

CLAIMS

1 I claim

2 1. A weight reduction composition, wherein the improvement comprises at least one of the  
3 substances selected from the group consisting of synephrine, hordenine, octopamine, tyramine  
4 and N-methyltyramine.

5 2. The composition of claim 1, wherein the composition is present in an amount of about 1-  
6 2000 mg.

7 3. The composition of claim 1, wherein the composition is present in an amount of about  
8 10-1000 mg.

9 4. The composition of claim 1, wherein the composition is present in an amount of about  
10 100 mg.

11 5. The composition of claim 1, wherein the synephrine content is 50% to 100% of  
12 substances selected from the group.

13 6. The composition of claim 5, wherein the synephrine is present in an amount of about 1 to  
14 500 mg.

15 7. The weight reduction composition according to claim 1, wherein the composition is in the  
16 form of a tablet, capsule, sustained release formulation, or powder.

17 8. The composition of claim 1, further comprising a pharmaceutically-acceptable-carrier-or  
18 diluent.

19 9. The composition of claim 1, wherein said composition is in a tea.

20 10. The composition of claim 1, wherein said human is overweight or obese.

21 11. The composition of claim 1, further comprising calorically restricting said human during  
22 said administering step.

23 12. An improved composition of a material derived from Citrus species and varieties of  
24 plants to cause weight loss and control body weight, wherein said material comprises at least

B2  
1 one of the substances selected from the group consisting of synephrine, hordenine,  
2 octopamine, tyramine and N-methyltyramine.

3 13. The composition of claim 12, wherein the material is in a fresh state, a dried state, a  
4 concentrated liquid form or a concentrated powder form.

5 14. The composition according to claim 12 wherein said material is the whole fruit of at  
6 least one of the plant species Citrus aurantium or Citrus reticulata in a fresh state, a dried  
7 state, a concentrated liquid extract, or a concentrated powder extract.

8 15. The composition according to claim 12 wherein the material is the peel of the fruit of at  
9 least one of the plant species Citrus aurantium or Citrus reticulata in a fresh state, a dried  
10 state, a concentrated liquid extract, or a concentrated powder extract.

11 16. The composition according to claim 12 wherein the material comprises the leaves of at  
12 least one of the plant species Citrus aurantium or Citrus reticulata in a fresh state, a dried  
13 state, a concentrated liquid extract, or a concentrated powder extract.

14 17. A physical performance enhancing composition wherein the improvement comprises at  
15 least one of the substances selected from the group consisting of synephrine, hordenine,  
16 octopamine, tyramine and N-methyltyramine.

17 18. The composition according to claim 17 wherein the substances are contained in material  
18 from Citrus species and varieties of plants.

19 19. The composition according to claim 17 wherein the material is in a fresh state, a dried  
20 state, a concentrated liquid form or a concentrated powder form.

21 20. The composition according to claim 17 wherein said material is whole fruit of at least  
22 one of the plant species Citrus aurantium or Citrus reticulata in a fresh state, a dried state, a  
23 concentrated liquid extract, or a concentrated powder extract.

24 21. The composition according to claim 17 wherein the material is the peel of the fruit of at

1 least one of the plant species Citrus aurantium or Citrus reticulata in a fresh state, a dried  
2 state, a concentrated liquid extract, or a concentrated powder extract.

3 22. The composition according to claim 17 wherein the material comprises the leaves of at  
4 least one of the plant species Citrus aurantium or Citrus reticulata in a fresh state, a dried  
5 state, a concentrated liquid extract, or a concentrated powder extract.

6 23. The physical performance enhancing composition according to claim 17 wherein the  
7 amount of the substances is from 1 to 500 mg

8 24. The composition of claim 23, wherein the synephrine content is 50% to 100% of the  
9 substances selected from the group.

10 25. The composition of claim 17, wherein the synephrine is present in an amount of about 1  
11 to 500 mg.

12 26. The weight reduction composition according to claim 17, wherein the composition is in  
13 the form of a tablet, capsule, sustained release formulation, or powder.

14 27. The composition of claim 26, further comprising a pharmaceutically acceptable carrier  
15 or diluent.

16 28. A composition of a material to increase muscle mass wherein the improvement  
17 comprises at least one of the substances selected from the group consisting of synephrine,  
18 hordenine, octopamine, tyramine and N-methyltyramine.

19 29. The composition according to claim 28 which further comprises Citrus plant material.

20 30. The composition according to claim 29 wherein the material is in a fresh state, a dried  
21 state, a concentrated liquid form or a concentrated powder form.

22 31. The composition according to claim 29 wherein said material is whole fruit of at least  
23 one of the plant species Citrus aurantium or Citrus reticulata in a fresh state, a dried state, a  
24 concentrated liquid extract, or a concentrated powder extract.

- 1 32. The composition according to claim 29 wherein the material is the peel of the fruit of at  
2 least one of the plant species Citrus aurantium or Citrus reticulata in a fresh state, a dried  
3 state, a concentrated liquid extract, or a concentrated powder extract.
- 4 33. The composition according to claim 29 wherein the material comprises the leaves of at  
5 least one of the plant species Citrus aurantium or Citrus reticulata in a fresh state, a dried  
6 state, a concentrated liquid extract, or a concentrated powder extract.
- 7 34. The composition according to claim 29 wherein the composition is in the form of a  
8 tablet, capsule, sustained release formulation, tea, or powder.
- 9 35. The composition according to claim 28 wherein the composition is in an amount of from  
10 1 to 200 mg.
- 11 36. The composition of claim 28, wherein said synephrine is in a concentration of 50% to  
12 100% weight by volume of substances selected.
- 13 37. The composition of claim 28, further comprising a pharmaceutically acceptable carrier  
14 or diluent.
- 15 38. The composition of claim 28, wherein the synephrine is present in an amount of about 1  
16 to 200 mg.
- 17 39. The composition of claim 28, wherein the composition amount is about 4-2000 mg.
- 18 40. The composition of claim 28, wherein the composition is present in an amount of about  
19 10-1000 mg.
- 20 41. The composition of claim 28, wherein the composition is present in an amount of about  
21 100 mg.
- 22 42. The composition of claim 28, wherein said human is overweight or obese.
- 23 43. The composition of claim 28, further comprising a high protein diet to said human  
24 during said administering step.
- 25 44. A method for stimulating thermogenesis in humans wherein the improvement comprises

1 administering by mouth to a subject at least one of the substances selected from the group  
2 consisting of synephrine, hordenine, octopamine, tyramine and N-methyltyramine in  
3 therapeutically effective amounts.

4 45. The method according to claim 44 further comprising plant material containing at least  
5 one of said substances.

6 46. The method according to claim 45 wherein the amount of the substances is about three  
7 to four percent by weight which is effective to increase the metabolic rate of the subject  
8 without inducing increased caloric intake.

9 47. The method according to claim 44 wherein the dosage is at least 0.02 mg per kg of ideal  
10 weight which is effective to increase the metabolic rate of the subject without inducing  
11 increased caloric intake.

12 48. A method of treatment for fostering weight reduction wherein the improvement  
13 comprises administering to a subject in need of the treatment a therapeutically effective  
14 amount of a weight reducing composition, comprising at least one of the substances selected  
15 from the group consisting of synephrine, hordenine, octopamine, tyramine and  
16 N-methyltyramine in a total daily dosage amount of 1 to 500 mg.

17 49. The method according to the claim 48 wherein the weight reduction composition consists  
18 of plant material which contains at least one of the substances selected from the group  
19 consisting of synephrine, hordenine, octopamine, tyramine and N-methyltyramine.

20 50. The method according to claim 48 wherein the amount of substance from said group is  
21 about 0.02 to 0.10 mg of per kg of ideal weight.

22 51. The method of claim 48 wherein the subject is on a hypocaloric diet.

23 52. A method for reducing the weight of a human, wherein the improvement comprises  
24 administering to the human a thermogenically effective dose of at least one of the substances  
25 selected from the group consisting of synephrine, hordenine, octopamine, tyramine and

53. A method for reducing the adipose tissue mass/lean mass body mass ratio of a human, wherein the improvement comprises administering to the human a thermogenically effective dose of at least one of the substances selected from the group consisting of synephrine, hordenine, octopamine, tyramine and N-methyltyramine.

10 55. The method according to claim 54 wherein the total daily dosage is about 500 mg.

12 57. A method of treatment for fostering improved physical performance wherein the  
13 improvement comprises administering to a subject in need of the treatment an efficacious  
14 amount of a composition comprising at least one of the substances selected from the group  
15 consisting of synephrine, hordenine, octopamine, tyramine and N-methyltyramine.

18 59. The method according to claim 57, wherein about 4 to 2000 mg/day are administered.

20 61. The method according to claim 57, wherein about 100 mg/day are administered.

22 63. The method according to claim 57, wherein said human is overweight or obese.

23 64. The method according to claim 57, wherein the subject is on a high protein diet.
